**RESTART OF DECONTAMINATION AND DECOMMISSIONING (D&D)
OPERATIONS IN ROOMS 125A AND 125B IN MODULE F — KDT-097-97**

Action: Review And Sign Concurrence

PURPOSE

The purpose of this correspondence is to outline the actions that have been taken to ensure the safe continuance of work in Rooms 125A and 125B in Building 707.

DISCUSSION

The preliminary short-term actions required for the restart of D&D activities in Rooms 125A and 125B have been completed. Two remaining actions concerning Radiation Control Technician coverage in high risk evolutions and Radiological Work Permit adequacy are being completed by Safe Sites of Colorado and Rocky Mountain Remediation Services, L. L. C. (RMRS) Engineering/Construction/Decommissioning/Facilities will obtain concurrence from Building 707 Radiological Operations Manager and Building 707 Operations Manager when these actions have been implemented.

The actions were performed and communicated in briefings to the D&D and radiological protection workers on July 18, 1997 and July 21, 1997. The attached restart checklist with rosters depict what was discussed. The checklist was developed to ensure that all of the short-term corrective actions were covered.

I attended and presented information to the group along with members of my staff and the Radiological Manager for our work. I feel that we have identified the problems that led to this incident. I am satisfied that these actions will ensure adequate control and minimize the change for recurrence.

RESPONSE REQUIREMENTS

Your signature is requested to indicate that you concur with RMRS in restarting D&D activities in Rooms 125A and 125B and lifting our self-imposed shutdown in this area. If
